SYNAPSES

GOT A SECOND?

⌄

The Synapses project needs you!

Calling all teachers and school leaders!

We would like to know **your opinion on the impact of environmental education in schools**.

Has environmental education truly prepared our students to grapple with the complex environmental, social and economic challenges they face in the real world?

Fill in the survey here!

We're grateful for your precious time and priceless feedback!

SYNAPSES International Course 2024
7-12 July 2024
Marathon, Greece

TEACHING FOR SUSTAINABILITY CITIZENSHIP

REGISTER NOW!

Register for the Synapses International Course!

7-12 July 2024, Marathon, Greece

The SYNAPSES Academy course is designed for school heads and teachers of both primary and secondary schools and is grounded in the concept of Sustainability Citizenship. The course is accredited by the University of Bayreuth and endorsed by the European Physical Society, the ECBA - European Countries Biologists Association and the European School Heads Association.

Register here!

Deadline to apply for KA1 funding: 20 February 2024

SYNAPSES

SYNAPSES project presents a vision on how pre-service and in-service programmes on teaching for **Sustainability Citizenship (SC)** could be interrelated and enriched to develop a joint offer with significant European dimension. SC has great potential for cultivating agents of change who not only envision but also enact solutions to climate change.

SYNAPSES will set up the Erasmus+ **School Heads and Teachers Training Academy** on Teaching for SC to ensure and safeguard the long-term impact of the proposed activities. A series of training activities will be organised to help teachers design more effective and engaging lessons making use of innovative teaching methods (inquiry-based, project-based, game-based) and tools (access to rich scientific data archives, virtual and remote experimentations, and animations) in their classrooms, so that students' learning about the environment, science, and technology can be thought of in a different and improved way. Concurrently, mobility opportunities will be offered with the goal of enabling the Academy to become a forum for the exchange of knowledge, an information hub that will support, develop, and promote teaching for SC.
