

# G-HOU 2024

Global Hands-On Universe Conference 2024

September 23-27 - Online

Join us from September 23 to 27  
Online

In 2024, the Global Hands-on Universe Conference takes place online in September. Join this online gathering of scientists, educators, and science enthusiasts from all continents and become part of a global network with one common goal: to bring Science Education to a whole new level.

For the past four years, the GHOU Online Conference received an amazing response from the community, connecting thousands of educators, researchers and science enthusiasts from over 90 countries. The online format allows participation by registered participants via Zoom, and by anyone else interested using [GHOU's Facebook page](#).

## WHAT IS GLOBAL HANDS ON UNIVERSE?

The Global Hands-On-Universe Conference gathers Astronomers, Educators and Scientists from several fields of knowledge to exchange ideas for hands-on science education. Among the highlights of these practices you'll find using **real-time remote telescopes**, **real science experiments in the classroom**, and development of fundamental **scientific skills in teachers and students**. The mission is to promote interaction between different countries, and engage teachers and students in a global science education cooperation where inclusion and equality are key.

## WHAT IS SPECIAL IN GHOU?

*We see a world with no borders...the same home for all*

### Online Conference

Join us online from anywhere in the world.

### Global

Sessions will be hosted in 3 different time zones. Choose the most convenient time for you.

### Inclusive

You'll be part of a global inclusive system that works and will improve your students' lives.

### Interactive

We can truly share experiences from many of our schools worldwide thanks to modern communication systems.

Discover the full programme and the conference topics on the conference website
